Subject: Re: Water Hauling from WGSL

Justin

I did receive approval from Ross T for PCS to commence hauling this water. Please discharge at the Comprehensive care building discharge manhole. PCS is familiar with this location. The discharge goes to the Waianae WWTP

Any questions feel free to call

Thanks
Jb

Subject: Water Hauling from WGSL

Aloha, as you know, the City stopped pumping ponded water from the Waimanalo Gulch Sanitary Landfill on Sunday, January 23. According to onsite representatives from the City (Fuji), the City needed to get back to its normal pumping schedule, but WM was able to continue with pumping via our third party pumping contractor (Pacific Commercial Services – PCS). PCS called the City today to make sure all was ok with them pumping, and they were met with some resistance. I just spoke with Ross Tanimoto and he indicated that since this was essential to reopening the landfill, the City would be able to handle the water that PCS will be hauling. Please let me know when we have concurrence on this urgent matter. PCS has trucks standing by awaiting approval to haul this water to one of the treatment plants that you specify. Thank you for your cooperation. I definitely appreciate the responsiveness that we have had from the City on this matter. Please call my cell phone (808-479-0749) with any questions that you may have.
